

WEB-BASED

Daily Operating Controls (DOCs) can be accessed from any computer at any location with an internet connection

MANAGED ACCESS

Authorised users can access **DOCs** areas to view daily performance against budget

MULTI-USER CONTROL

Login and password control for users. Users can only access **DOCs** for which they have the necessary authority

STAFF LISTING SETUP

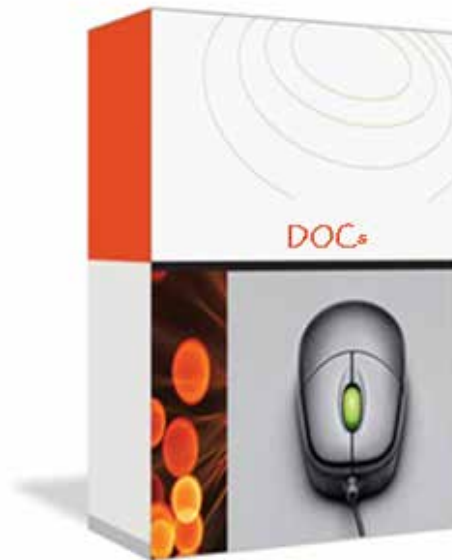

Complete staff listing setup for each department, with joining and leaving dates

MULTI-LEVEL REPORTS

Daily, monthly and user-selected date range reports for Sales Executives and Technicians

FRANCHISE VERSION

DOCs can be easily configured for full dealer network including upload of vehicle model and pricing database

Why **DOCs** from apd?

- **DOCs** - allows the user to see the current business activity as it actually happens
- **ProfitPlanner[®]** - Budget forecasts the future activity for the business
- **iCIS[®]** - Composite provides feedback of what has taken place in the business past
- **DOCs** delivers results each and every day, showing daily reports tracking the performance of Sales, Service, Bodyshop and Parts Departments, along with the Company Summary all against the current month's budget. View the complete picture as you drill down to Sales Executive and Technician level, or zoom out to departmental or whole business reports

DOCs is a web-based application. It provides users with a daily insight into the performance of the key operational areas of their business, enabling the all-important focus on the financial performance to be maintained

DOCs operates directly in partnership with **ProfitPlanner** (*dealership budgeting tool*) giving the user the ability to monitor dealership daily financial performance against budget

Multi-site dealers can be linked together to create a consolidation of the dealer group with all sites or a user-selected combination of sites

Manufacturers can have a franchise-specific version customised for their own network of dealers, complete with vehicle model and pricing database for simple and consistent data input

DOCs takes into account working days and bank holidays

DOCs is actively used throughout the automotive industry with individual dealerships and dealer groups

Daily input takes only a few seconds to complete

The main registered dealer master user can configure access for other users within the dealership, granting each user individual access privileges to the features of the system

All technical support queries are tracked, categorised and used internally during product development reviews as part of the product lifecycle development programme. The aim is to make **DOCs** as user friendly and as functionally rich as possible

DOCs[®]

Daily Operating Controls - your finger on the pulse of the dealership

Reporting Features

- **Daily DOC Report**
Full Picture of Actual vs. Budget
